

BLADE MOUNTING APPARATUS FOR A CUTTING IMPLEMENT

Abstract of the Invention

Asst
12/16/02

An apparatus for mounting a blade to a cutting implement ~~is provided. The~~
~~apparatus~~ includes an adapter which enables the blade to be fastened with the
implement with structure that is offset from its axis of rotation. With this mounting
capability, structure used to secure the blade relative to the cutting implement
experiences decreases occurrences of tightening relative to the blade with which it is
associated. Accordingly, there is ~~presented~~ an ~~enhanced~~ ability to remove the blade
^{during}
when such removal is desired.

Assignment

The entire right, title and interest in and to this application and all subject matter disclosed and/or claimed therein, including any and all divisions, continuations, reissues, etc., thereof are, effective as of the date of execution of this application, assigned, transferred, sold and set over by the applicant(s) named herein to Deere & Company, a Delaware corporation having offices at Moline, Illinois 61265, U.S.A., together with all rights to file, and to claim priorities in connection with, corresponding patent applications in any and all foreign countries in the name of Deere & Company or otherwise.
